

Jordan Rivera

jordan.rivera@example.com | (555) 010-2233 | github.com/jrivera | Austin, TX

SUMMARY

Backend engineer with 5 years of experience building data-heavy web services in Python. Comfortable owning features end to end, from schema design to production monitoring.

EXPERIENCE

Software Engineer II, Brightline Analytics | Austin, TX

Mar 2022 - Present

- Built and maintained 12 Flask microservices serving 3M requests per day for the customer reporting platform
- Designed a Postgres schema and query layer that cut report generation time from 40s to 6s
- Responsible for migrating nightly batch jobs to Airflow, reducing failed runs by 70%
- Mentored two junior engineers through onboarding, code reviews, and their first production launches
- Worked on the internal alerting tool used by the on-call rotation

Software Engineer, Pinecrest Health | Remote

Jun 2019 - Feb 2022

- Developed REST endpoints in Django for a patient scheduling app used by 40 clinics
- Helped containerize legacy services with Docker and moved deployments to a Jenkins pipeline
- Wrote unit and integration tests with pytest, raising coverage from 35% to 80%
- Partnered with product managers and clinicians to scope features and prioritize the backlog

PROJECTS

- **Budget Buddy:** personal finance tracker built with React and a FastAPI backend, deployed on AWS Lambda
- **Trail Finder:** scraped and cleaned public trail data with pandas, then built a search UI with Elasticsearch

SKILLS

Languages: Python, SQL, JavaScript, Bash

Frameworks: Flask, Django, FastAPI, React

Data and infrastructure: PostgreSQL, Redis, Airflow, Docker, Kubernetes, AWS, Git, Linux

EDUCATION

B.S. in Computer Science, University of Texas at Austin, 2019
